EXPERIENCE

STREAK AI TECHNOLOGIES LLC, Seattle, WA

Founder & AI Product Builder, *StreakFit AI* Jun 2026 – Present

- Formulated 3 hypotheses targeting students' gym routine problems based on secondary research and then conducted 6 primary research interviews, leading to 3 insights discovery; built & demoed a spec-driven v1 app at OpenAI CodeX Hackathon.
- Iterating v3 of a 0-to-1 AI gym buddy app basis feedback from 30+ people; building behavioral psychology informed personalized AI features such as check-ins, multi turn conversations and in-app nudges using prompt, context, & memory engineering.
- Demoed at 3 hackathons, winning 2nd place among 24 teams in MKTG 565, Building Business Applications of LLMs Hackathon.

AI Product Builder Sep 2025 – May 2026

- Led an 11-member cross-functional team (Design/Eng/Biz) to build HeyLily, a GenAI scam-call assistant app for seniors based on 15+ user interviews; guided design & dev team on UX & engineering solutions; crafted a 5-year B2B2C GTM & Finance model.
- Pitched HeyLily to 12 Venture Capitalists from PNW area at Pioneer Square Labs, securing investment approval from 5 VCs.
- Interviewed 2 hike organizers to identify planning pain points; architected AI Hike Researcher, a cost and time efficient multi-step AI agent that gathers 6 real-time safety signals and personalizes trail filtering, reducing weekly planning time by 98%.
- Built a GenAI powered Spotify music recommendation engine in n8n for mood and occasion based sub-playlist curation, dynamically selecting from 12 song attributes to improve relevance by 73% versus a rule-based baseline.
- Launched & conducted a new 'Product Teardown' series to decode popular products, producing 3 events with 110+ attendees.

AMAZON WEB SERVICES, Seattle, WA

Senior Product Manager Technical - External Services, *AWS Billing and Cost Management (FinOps)* Jun – Sep 2025

- Authored a 6-page strategy narrative for AWS FinOps Cost Optimization to gain Director level (L8) alignment on OKRs & customer needs across segments, synthesizing insights from 45+ field interviews, 1000+ requests, & 'State of FinOps' reports.
- Discovered and prioritized 6 new features using a customer-aligned Effort-Risk-Savings framework, informing the 2026 roadmap.
- Conducted 10 VoC interviews with customers including Salesforce, Twilio, & BMW to uncover FinOps practices & S3 pain points, defining a PRFAQ (PRD) for 3 rigorously scoped S3 features with up to 40% savings potential; one is now in development.
- Developed S3 cost savings model across 24 pricing combinations (8 levers × 3 storage classes) with S3 Storage experts; introduced a mitigation plan to correct 6 conservative defaults and increase savings estimate accuracy by 8x.

MICROSOFT, Bangalore, India

Technical Product Owner, *Azure Data Lake Storage (Network File System)* Jul 2021 – Jul 2024

- Discovered, defined & built a 0-to-1 storage client for BlobNFS (WSL2 virtualization based), giving agentic workloads a sandboxed storage environment; unlocked a new Windows segment and onboarded 150+ B2B customers with 100s of petabytes of usage.
- Delivered high-throughput (1Tbps & 200k IOPS) distributed cloud storage system for data analytics workloads, scaling the capacity 8x to meet enterprise requirements; orchestrated delivery across 4 global engineering teams.
- Ideated & developed a 5x memory efficient 'chunked' cache & 'soft purging' algorithm to address metadata API latency for HPC customers, reducing customer-related incidents (CRIs) by 95% and driving a 30% increase in adoption among AI/ML workloads.

Software Engineer, *Azure Monitor & Migrate* Jul 2018 – Jul 2021

- Designed the UX for the Action Rules feature that increased CSAT from 62% to 89%; reduced the page load latency by 80% via component redesign and lazy loading in a Typescript framework, earning the 'Customer Obsession' award.
- Rearchitected Azure Cosmos Database to reduce cost by 45% for a write heavy workload by distributing load across partitions.
- Modernized the compute fleet by migrating to Service Fabric orchestrator platform (Microsoft's Kubernetes alternative), improving availability by 3x (Availability zones) for better Disaster Recovery while reducing the compute cost by ~53%.

EDUCATION

FOSTER SCHOOL OF BUSINESS, UNIVERSITY OF WASHINGTON, Seattle, WA Jun 2026

Master of Business Administration (MBA), Management Science (STEM), VP of Foster Tech Club & Global Business Association

PES UNIVERSITY, Bangalore, India June 2018

Bachelor of Engineering, Computer Science, 9.5 CGPA, Top 5% of the class

SKILLS & TOOLS

- Skills: User & Market research, Cross functional collaboration, UI/UX Design thinking, Prototyping, Gen AI & ML, FinOps, DevOps, Competitive Analysis, Product Strategy, Metric-driven Prioritization, Go-to-market, Agile, CI/CD, Virtualization, Network Storage, Compute, Workflow automation, Developer Experience, Technical Roadmap, Database Engine optimization, KPI, API
- Tools: Claude Code, LLM & RAG, Figma, Canva, Tableau/Power BI, AWS, Azure, Java, Python, SQL, NoSQL, CLI, Bash, DevTools
